LIFE SCIENCES AND MEDICAL TECHNOLOGIES | DuaneMorris®

BIOLOGICS AND DRUGS

BIOLOGICS AND DRUG PIONEERING SOLUTIONS

Helping to bring innovative life-saving products to the market effectively and efficiently.

As biotech, biopharma and pharma companies develop new therapeutics, aligning legal strategies with development and commercialization goals throughout the extensive process of funding, R&D, clinical trials and market entry is imperative to a company's strategy, success and growth. We assist clients in developing and implementing strategies to protect and expand their pipeline and maximize the benefit of their products to their target patient population.

MEDICAL DEVICES

BRINGING TECHNOLOGY TO LIFE

Representing top medical device manufacturers working to improve and enhance medical outcomes.

Medical device manufacturers encounter a wide range of issues when bringing a product to market and keeping it on the market. From device design and development through clinical trials and regulatory approval before marketing, to post-market surveillance and product liability concerns, medical device manufacturers face a complex field of potential issues and problems. We assist medical device manufacturers at every stage of the lifecycle of a medical device—from protecting IP, negotiating supply and distribution contracts, assisting with the regulatory review process, and mitigating and defending against the threat of products liability litigation.

DIAGNOSTICS

INNOVATIVE INSIGHTS

Providing strategies to deliver diagnostic and imaging offerings and services to the world.

Diagnostics and personalized medicine companies developing and commercializing innovative tests face an evolving patent landscape, increased regulation and challenging data, privacy and reimbursement issues. A multifaceted strategy is key to monitoring and addressing these challenges.

EMERGING TECHNOLOGIES

CUTTING-EDGE LIFE SCIENCE INNOVATIONS

Providing creative solutions for disruptive technologies.

As artificial intelligence, additive manufacturing, robotics and telemedicine/digital health revolutionize discovery, development and manufacturing of biologics, drugs, diagnostics and medical devices, legal solutions to address traditional and unprecedented IP, regulatory, data and privacy issues must be reimagined to keep pace.

CROs, CMOs AND CSOs

ENABLING SOLUTIONS

Advising leading contract organizations on providing health insights and solutions.

Contract research, manufacturing and sales organizations provide vital resources and expertise to companies developing new products and technologies as an avenue to improve efficiencies and smooth market entry. Up-to-date advice on contracting, compliance and regulatory developments and solutions facilitates seamless integration of contract services for translating cutting-edge concepts and discoveries to the market.

AGRICULTURE AND ANIMAL HEALTH

EXPERIENCE IN THE FIELD

Raising understanding of the agriculture and animal health industries and how the two intersect.

Duane Morris attorneys are well-versed in this specialized area and provide incisive strategies for exclusivity and market positions, including IP procurement, defense and enforcement. When it comes to veterinary pharmaceuticals, vaccines, biologicals, and plant and plant-related technologies (including traditional Mendelian genetics through genetically modified plants for heterologous expression of proteins useful in pharmaceuticals). Our attorneys have extensive experience in obtaining, defending and enforcing IP, as well as in clearing the underbrush of third-party patent positions. Duane Morris is uniquely positioned to protect hard-earned scientific advancements and secure and preserve market and exclusivity positions in the agriculture and animal health industries.
